# JumboFlex Mobile

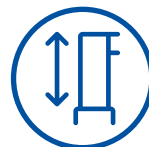

The transportable tube lifter solution

A tube lifter that can be used for the handling of goods in changing locations and that offers very compact transport dimensions: Introducing the JumboFlex Mobile.

## Ergonomic handling

Tube lifter JumboFlex and responsive articulated arm jib combined in one solution

## For changing locations

Compact transport dimensions thanks to height-adjustable column and compact parking position of the articulated arm

## Low-noise working

Low noise level due to sophisticated main body with very good sound insulation

## Plug and work

The JumboFlex Mobile can be operated on standard industrial sockets with a voltage of 400 V 50 Hz 16 A

# JumboFlex Mobile

The transportable tube lifter solution for packages weighing up to 50 kg

## APPLICATIONS

- Transportable handling solution for flexible use in changing locations
- Handling workpieces weighing up to 50 kg with the JumboFlex one-hand tube lifter
- Ideal as a temporary solution, but also for permanent use, such as for loading machines
- Operation via power connection (400 V 50 Hz 16 A)

Thanks to its compact dimensions, the JumboFlex Mobile can be easily transported to the job site

## DESIGN

- (1) Vacuum tube lifter JumboFlex with 35 kg or 50 kg load capacity and approx. 1,500 mm lifting stroke
- (2) Height-adjustable column for compact transport size of approx. 2,250 mm total height
- (3) Responsive articulated arm jib with 360° radius of action with approx. 2,400 mm reach and approx. 1,600 mm moving length
- (4) Basic module with vacuum generation and status LED display

System design JumboFlex Mobile

Ergonomic handling thanks to the proven intuitive one-hand operation of the JumboFlex

A status LED provides clearly visible information about the current operating status

The simple control panel enables error-proof operation of the JumboFlex Mobile
