

PalPharmaTrac™

Overhead Support Systems for PalPharmaVac™ Units

Maximise operational space and efficiency with PalPharmaTrac™ overhead support systems. Designed for clean room environments, these systems offer precise movement and easy maintenance, ensuring smooth handling of materials up to 2000kg.

Product information

The Manual Handling Disadvantage:

- ✓ Workforce fatigue and injuries
- ✓ Reduced throughput
- ✓ Risk of damage to product

The PalPharma Advantage:

- ✓ Single operator usage
- ✓ Increased throughput
- ✓ Workforce and product protection
- ✓ Operational cost reduction
- ✓ Increased productivity and profitability

FORMERLY  Palamatic

Swing Jib

The lifting system runs up and down the swing arm which moves side to side giving 270° coverage and up to 350kg working load.

An inverted or articulated jib can be offered which can also offer 180°/360° coverage.

- ✓ Can be hung from existing steelwork, wall mounted, ceiling mounted or as a mobile base option.
- ✓ 180° or full 360° coverage.
- ✓ Lifting products up to 350kg (772lb)

Articulated Jib

All articulated arm jibs can be suspended from vertical steel columns or from existing stanchions. In some cases these can also be fitted to a building wall and offered as a mobile version.

- ✓ Process operations that require a greater working area reach
- ✓ Facilities where either space or headroom is at a premium
- ✓ Lifting products up to 250kg (551lb)
